

Wooden Cassette Flooring

Product Sheet

TECHNICAL SPECIFICATIONS

Cassette Flooring

Our cassette floor is a professional, modular and heavy-duty solution designed for temporary structures, events and long-term outdoor use. It combines durability, fast installation and clean aesthetics, and is built specifically for intensive rental environments.

System & materials

- Pressure-treated Norwegian pine, 20 mm thick
- Treated for long-term outdoor use in all weather conditions
- Optional custom varnish finishes available at surplus price (to be determined)
- Aluminum edge profiles protect all saw edges against transport and assembly damage
- Steel intermediate beams + aluminum board profiles for high structural stability
- Built and assembled with care in Belgium

The result is a floor that is both robust and visually clean, with a high level of craftsmanship and longevity.

Board design

- Board size: 1,00 × 2,50 m
- Weight: ± 40 kg per board
- Aluminum Morsink profiles integrated on each board
- Stackable for compact storage and transport
- 19–20 boards per stack
- Dedicated forklift panel with brackets for safe handling

Easy to load/unload with a forklift and optimized for professional logistics.

Substructure & installation

- Metal bar / steel beam substructure included
- Fast, stable and straightforward assembly
- Leveling possible with:
 - our stackable wooden leveling blocks (optional – see attached), or
 - plywood/wood blocks, Layher or similar systems

Everything required for installation is included (except optional leveling blocks): metal support bars to build 1 size of choice.

Extra metal bars available for purchase for specific needs.

The system is also compatible with existing cassette floors such as Veldeman, allowing integration with mixed inventories.

Cassette Flooring

Our cassette floor is a professional, modular and heavy-duty solution designed for temporary structures, events and long-term outdoor use. It combines durability, fast installation and clean aesthetics, and is built specifically for intensive rental environments.

Flexibility

- Create any floor size where:
 - one side = multiple of 1 m
 - other side = multiple of 2,5 m
- Suitable for tents, domes, tipis, stages, hospitality areas, temporary buildings, etc.

Logistics (important to consider)

This is a professional flooring system, so transport differs from tents and poles.

- For larger surfaces (+150 m²), proper trucks are recommended
- Smaller volumes can still be transported with large trailers
- Forklift access strongly advised for efficient handling
